A. PRICING RATES AND TRANSPORTATION INFORMATION

For Pricing, Royalty Rates and Transportation Information for November 2010, refer to [Attachments 1, 1A, 2, 2A](#) and [3](#). These attachments are also available in [Excel Format](#).

B. NOTICES

Royalty Adjustment Statement Change

A new column will be added for “Oil Taken” on the Royalty Adjustment Statement. This may impact clients who use the Comma Separated Values (CSV) format of this report. This column will display the total oil quantity taken against the volume cap for those wells that are eligible for the Emerging Resource and Technology rates, which have a shared volume cap with Oil. This column will be added to the end of the CSV file.

This change will appear on the reports sent out in the calendar month of March 2011.

Submission of Production Year 2010 Allowable Cost (AC) and Sulphur Corporate Average Price Calculation (VA3) Submissions

Royalty clients are advised that Allowable Cost (AC1, AC2, AC3 and AC5) and Annual Corporate Average Price Calculation - Sulphur (VA3) submissions for the 2010 production year are due on the following dates:

Form Type	Due Date	Penalty
AC1	March 01, 2011	-
VA3	April 15, 2011	\$1,000/One time only
AC2	May 2, 2011	\$100/Form/Month upon due date to a maximum of \$600
AC3	May 16, 2011	-
AC5	May 16, 2011	\$100/Form/Month upon receipt to a maximum of \$600

Reminder: Operating costs must be reported with capital costs (AC2) on one submission.

Details on the changes to [Gas Cost Allowance](#) are available on the Alberta Energy Internet address: www.energy.alberta.ca. From “Our Business”, navigate to “Natural Gas”, “Legislation, Guidelines & Policies”, “Gas Royalty Information Bulletins”.

Please note that all allowable cost submissions (initial and amended filings for current and prior production years) by FCC operators are required to be completed on the Registry. Although use of the Registry to submit AC3 and AC5 data is mandatory for operators, it remains voluntary for non-operators. However, non-operators are strongly

encouraged to use the Registry to submit and retrieve their AC3 and AC5 data. The business rules and submission method for VA3 submissions remain the same with notification from the department informing clients that their submissions have been processed. Annual allowable cost submissions are processed nightly except during an invoice run cycle. New facility cost centre set-ups are processed within four hours of receipt if received in the morning with an overnight turnaround if received in the afternoon. Processing of new facility cost centre set-ups continue during an invoice run cycle. Sulphur Corporate Average Price submissions are processed as they are received.

The Department encourages timely submissions to allow sufficient turnaround time for corrections. The font size on faxed forms must be 10 pt or greater and must not be bold. Penalties will apply where valid system acceptable submissions are not received by the filing deadline. Barring the Department's responsibility, inability to submit annual cost submissions on the Registry and/or illegible script will not reverse a penalty once imposed.

Should you have any questions or require clarification regarding these matters, please contact Will Wong at (780) 415-0755 or e-mail Will.Wong@gov.ab.ca

Capital and Operating Cost Allowance Filing - Expected AC2 Reports on the Registry

The Crown deducts allowances for costs incurred and paid in Alberta for compressing, gathering and processing its royalty share of gas and gas products. Annual capital and operating cost allowances are combined on the AC2-V4 with an ability to allocate these cost allowances among working interest owners and multiple delivery facilities. The Facility Cost Centre (FCC) operator, on record at year end, is responsible for filing the AC2-V4 via the Registry.

The Expected AC2 Report identifies the FCC operator as of a specific date and is generated to aid FCC operators in verifying their status as well as effective date. In addition, it identifies whether a valid AC2 was submitted for a production year.

The Expected AC2 Report is grouped by an Energy Resources Conservation Board (ERCB) Facility and related FCC. The report displays the following:

- Facility ID and Facility Name
- FCC ID and FCC Name
- “Y”(yes) and “N”(no) Indicators to identify whether or not the FCC is fully depreciated
- The FCC Operator Effective Date
- “Y”(yes) and “N”(no) Indicator to determine whether or not an AC2 was submitted for the production year
- All consolidated/amalgamated companies have been included within this report, where applicable.

The information in the report reflects the Department's records as of the file preparation date and does not reflect submissions subsequently received and/or processed. Any

submissions (AC1, AC2, Invoice Consolidation Concurrence – ICC1, etc) processed after the report date will not be shown. Please note that absence of a company name or FCC from these reports will not be an acceptable reason to waive a penalty once assessed.

The Expected AC2 Report is available in PDF, TXT and CSV formats and is generated weekly during the Gas Cost Allowance reporting season. Expected AC2 reports will be available on the Registry on Monday, February 7, 2011, and each Monday thereafter to Monday, May 9, 2011, with the exception of Mondays that are non-business days or Mondays that coincide with invoice processing. This report may also be requested on demand, on a client basis, by contacting your Gas Royalty Client Service portfolio representative as identified in [Section F](#) of this bulletin or Will Wong at (780) 415-0755.

If you are not the operator for the FCC identified on the report, please submit a Facility Cost Centre Set-Up/Change (AC1-V2) via the Registry identifying the change in operator and its effective date. An AC1 submission identifying an FCC change in operator is due on or before the last day of the month following the production month in which the change occurred.

Please note that FCCs that are shut-in or terminated for an entire production year will not appear on the report. Operators of fully depreciated (zero remaining useful life) FCCs remain responsible for AC2-V4 submissions. Submissions are required to ensure the Department has correctly identified Capital and Operating Cost Allowance allocations to working interest owners and/or other delivery facilities as well as Custom Processing Adjustment Factors for the FCC.

AC2-V4 submissions are required to be filed on the Registry. An AC2-V4 can be entered online or by batch. If a system acceptable AC2-V4 submission is not received and processed by the filing deadline (April 30th of the year following the production year to which it relates), a penalty will be assessed. Please contact The Petroleum Registry of Alberta, Service Desk, regarding access to or utilization of the registry at 1-800-992-1144.

Please be reminded that the deadline for filing an AC2-V4, for the production year 2010, is May 2, 2011.

Custom Processing Allowance Fees Paid – Expected AC5 and Energy Adjusted Gas Equivalent Volume (EAGEV) Reports on the Registry

Royalty clients that have incurred and paid for compressing, gathering and/or processing gas and gas products on a fee-for service basis, in Alberta, are required to submit an AC5-V4 to the department by May 15th of the year following the production year to which it relates. This includes custom processing fees associated with freehold, purchased, and out-of-province volumes. The Expected AC5 Report provides a complete list of the Energy Resources Conservation Board (ERCB) facilities and related Facility Cost Centres (FCCs) where the operator has allocated custom user volumes to the royalty client in Parts 6 and 10 (Custom Processing Adjustment Factor) of a Capital & Operating Cost Allowance AC2-V4 submission.

This report is generated to aid royalty clients in identifying the ERCB facilities and FCCs that require the royalty client to file an AC5-V4. The information in the report identifies the department's records as of the file preparation date and does not reflect submissions subsequently received and/or processed.

The Expected AC5 Report is grouped by ERCB Facility and related FCC. The report displays the following:

- FCC ID, FCC Name & FCC Type
- Operator ID and Name allocating custom user volumes
- Allocated Custom Processing (CP) volumes in 10^3m^3

In addition, as of the report generation date, there are “Y” (yes) and “N” (no) indicators for the previous and current production years that identify whether the:

- department has received a valid AC5 submission for the royalty client and
- whether the ERCB facility has been reported on the AC5 submission.

The EAGEV report is generated for all royalty clients and identifies volumetric allocations for volumes produced (SAF/OAF and RMF2) at ERCB facilities. This report should be used in conjunction with an Expected AC5 Report as a royalty client cannot file an AC5-V4 submission unless volumes have been reported at ERCB facilities identified on the EAGEV report. In addition, if a royalty client has custom user volumes which do not appear on the Expected AC5 Report, indicates that the operator has not identified the client on the AC2-V4 submission. This inconsistency may indicate filing discrepancies that require an amendment by the facility operator.

If a system acceptable AC5-V4 submission is not received and processed by its filing deadline (May 15th of the year following the production year to which it relates) it is subject to penalty charges upon receipt. Please note that the absence of a company name or an FCC from these reports will not be an acceptable reason for a waiver of penalty.

Both the Expected Custom Processing Fees Paid (AC5) report and the EAGEV report are available in PDF, TXT and CSV formats. Expected AC5 and EAGEV reports will be available on the Registry on Friday, February 11, 2011, and each Friday thereafter to Friday, May 27, 2011, with the exception of Fridays that are non-business days or Fridays that coincide with invoice processing. Operators of FCCs must utilize the Registry to retrieve these reports. The delivery of the EAGEV report on these specific dates is intended for the convenience of the client only, and is not intended to replace the normal delivery and/or availability of the report that is scheduled monthly. Non-operators and other royalty clients that currently submit and receive hard documents will continue to receive the Expected AC5 report accompanied with an EAGEV report, by mail, on the same delivery schedules prescribed above.

In addition, both reports may be requested on demand on a client basis by contacting your Gas Royalty Client Service portfolio representative as identified in [Section F](#) of this bulletin or Will Wong at (780) 415-0755 or email Will.Wong@gov.ab.ca.

Electronic filers are required to submit their Allowable Cost forms via the Registry. Contact the Petroleum Registry of Alberta Service Desk regarding access to or utilization

of the Registry. To contact the Petroleum Registry of Alberta Service Desk call: 1-800-992-1144.

Please be reminded that the deadline for filing an AC5-V4, for the production year 2010, is May 16, 2011.

C. MONTHLY INFORMATION

November 2010 Royalty Due February 28

- **Royalty clients are to remit the total amount payable shown on the February 2011 Statement of Account by February 28, 2011.** If the amount payable includes accrued current period interest, the interest has only been accrued to the statement issue date. Clients must also include the additional interest that has accrued from the statement issue date to the date of payment, using the per diem amount provided.
 - **The February 2011 Statement of Account shows your amount payable as of the Statement issue date. It includes any outstanding balances from your previous statement, your November 2010 invoice amount and any applicable current period interest charges. It also identifies refunds resulting from overpayments.**
 - Current period interest will not be charged on current invoice charges for the production month of November 2010 if it is paid in full by February 28, 2011.
 - Current period interest will accrue on any overdue charges commencing the first day after the due-date until it is paid in full.
- Note: If the due date falls on a non-business day, the next business day will apply as the due date.**
- Cheques are payable to the Minister of Finance, Province of Alberta.

December 2010 VA4 Due February 15

The VA4 forms for the production month of December 2010 are due in the department offices by February 15, 2011.

Note: If the due date falls on a non-business day, the next business day will apply as the due date for VA4 forms.

Registry Deadline Submissions

The Registry deadline submissions for SAF, OAF, and Volumetrics are posted in the [Petroleum Registry of Alberta](#) website “Reporting Calendars” under Calendars. Changes to this calendar will be posted on the Registry website home page in “Broadcast Messages.”

Interest Rate January 2011

Alberta Energy’s interest rate for January is 4.00%.

October Provisional Assessment Charge

The summary of Provisional Assessment Charges for all production periods in the October 2010 billing period was:

First Time Provisional Assessment	Reversals of Provisional Assessments	Net Provisional Assessment
\$2,814,731.31	(\$1,279,275.76)	\$1,535,455.55

October Penalty Charges

The penalty table below shows at the form level, the total penalty charges and reversals, for the October 2010 billing period:

FORM	Penalty Charges	Penalty Reversals	Net Penalty Charges for 2010/10
AC2	\$203,900	(\$31,600)	\$172,300
AC4	\$0	\$0	\$0
AC5	\$0	\$0	\$0
NGL1	\$0	\$0	\$0
VA2	\$0	\$0	\$0
VA3	\$0	\$0	\$0
VA4	\$200	\$0	\$200
Total	\$204,100	(\$31,600)	\$172,500

Gas Royalty Operations Support

Upon request, Gas Royalty Operations staff will be available to meet with clients who need assistance with royalty reporting. Royalty clients requiring assistance are encouraged to contact your respective Gas Royalty Client Services portfolio representative, as identified in [Section F](#) of this bulletin, to arrange a meeting.

Well Event Measured Depth Determination Letter

The department has issued a “Well Event Measured Depth Determination Letter” under the Report Package DOE – Gas to facility operators via the PRA on January 5 and 12, 2011. This letter shows the confirmed Measured Depth (MD) of each active well event that will be used to calculate the Depth Factor (DF) of the quantity component rate under the new royalty formula. A well event that is not listed on the letter and does not have a confirmed MD will receive a DF of one (1). When the changes to the MD are confirmed by the department, a letter is issued to a facility operator who reports changes through the PRA to well event attributes affecting MD. All changes to the MD are applied on a go forward basis only. Facility operators are advised to submit well event attribute changes by the last day of the calendar month in order for timely determination of MD.

D. INFRASTRUCTURE DATA CHANGES

Client ID Listing

The BA Identifiers Report is a directory of Business Associate (BA) names, codes, status (e.g. struck, active, amalgamated, etc.), status effective dates, and effective August 2004, includes Working Interest Owner (WIO) role start/end dates.

This report is also published daily on the Petroleum Registry website at:

<http://www.petroleumregistry.gov.ab.ca>

The department reminds Business Associates to review their WIO role to ensure that the start and end dates are reflected correctly. If the BA does not have an active WIO role, the operators cannot allocate volumes to the BA for the relevant production periods through the SAF/OAF allocations.

- If a BA has a WIO role, then that BA can receive SAF/OAF allocations from the WIO role start date forward.
- If a BA has a WIO role with an end date, then they can only receive SAF/OAF allocations from the WIO role start date until the end date. Any SAF/OAF allocations after the end date will be rejected.
- If a BA does not have a WIO role start date, then that BA cannot receive SAF/OAF allocations.

Please contact Client Registry at 780-422-1395, if you have any questions regarding the information supplied on this listing.

Client Status Changes

Clients must ensure that all royalty documents are completed using only valid client names and IDs. It is critical that royalty clients use current legal client names and their

appropriate IDs on all documents to ensure accurate royalty calculation and to prevent provisional assessment and penalties. Rejects will occur when invalid IDs are used.

If you require information regarding client names or IDs, please contact Client Registry at 780-422-1395.

Nova Tolls - Multiple Gas Reference Prices

Royalty information related to the implementation of the Factor Model negotiated with industry for determining Multiple Gas Valuation Prices is provided on the Natural Gas website's Royalty Related Information page under [Facility Royalty Trigger Factors and Meter Station Ties](#).

E. REMINDERS

Alberta Royalty Framework Gas Cost Allowance (GCA) Allocation Edits

Under the Alberta Royalty Framework rules and edits, a cost allocation to another facility is only allowed if there is a physical flow of volumes between the facilities. In response to an industry concern that the administrative effort to align costs with volumes for the 2009 production year was significant and burdensome, the department agreed to an interim deferral of the volume edit rule and implemented a manual process to recognize reporting situations involving common upstream facilities as exceptions for cost allocation. The expectation was that industry would properly align their costs and volumes for the 2010 production year's annual cost reporting.

Based on a limited number of exceptions for the 2009 production year, the department concludes that the administrative effort to align costs with volumes does not appear to be significant or burdensome. Therefore, effective immediately, the interim deferral and manual process are terminated. Any previously approved exceptions will continue to be recognized for the 2009 production year only. Depending on the reporting situation, facility cost centre operators have a number of options to align costs with volumes for 2010 and subsequent production years:

1. If there are no longer any volumes at the reporting facility, discontinue reporting at that facility and commence reporting at the allocation facility
2. If there are volumes at both facilities, transfer a portion of the reporting facility's costs and commence separate reporting at each facility
3. If both facilities receive volumes from a common upstream facility, discontinue reporting downstream and commence reporting upstream
4. If a common upstream facility is a battery, transfer a portion of the reporting facility's costs and commence separate reporting at each facility

If you have questions, please contact your respective Gas Royalty Client Services'

portfolio representative, as identified in [Section F](#) of the Information Bulletin, or Will Wong at 780-415-0755 or e-mail Will.Wong@gov.ab.ca.

Release of Royalty and Related Information

To maintain the confidentiality of royalty information client specific information will be released, to a third party, only with the written consent of the royalty client. If a royalty client has a third party preparing royalty submissions on their behalf, they must ensure the department receives written notice, from the royalty client, authorizing the release of royalty information. (Chapter 1, Section 3 – Alberta Natural Gas Royalty Guidelines, 2006).

Alberta Energy – Gas Royalty Calculation Calendar

A [2011 calendar](#) is enclosed, which provides critical filing dates that clients are required to meet with respect to Gas Royalty processing cut-off periods.

Statutory Requirement and Recalculation of 2006 Royalty

A production year becomes statute barred on December 31st, four years after the end of a production year. Once a year has become statute barred, calculation or recalculation of royalty does not occur on a monthly basis. Section 38 of the Mines and Minerals Act provides for recalculation of royalty that can be initiated in two ways:

1. On the department's initiative in conjunction with an audit or examination; or
2. At the request of a royalty payer.

Department Initiated Amendments

Please refer to [Attachment 4](#) for a list of Deep Gas Royalty Holiday (DGRHP) wells, which require the fifth (5th) year to be open for the 2006 production year. The Department will contact clients who are impacted, individually. For more information, please contact Joyce Chen at 780-427-1550.

Please refer to [Attachment 5](#) for a list of Otherwise Flared Solution Gas facilities, which require the fifth (5th) year to be open for the 2006 production year. The Department will contact clients who are impacted, individually. For more information, please contact Penny White at 780-422-8083.

Audits in Progress

Non-operator partners are advised that certain 2006 Enhanced Oil Recovery, CO2 Project Credit claims, Allowable Costs, Custom Processing Fees, Capital Costs and Custom Processing Adjustment Factor (CPAF), and Volumetric Reporting Discrepancy Audits are currently in progress.

However, completion of the audits and royalty recalculations and assessments, if required, will occur in 2011. Royalty clients are also reminded that amendments

received by the Department in the fourth year following the production year may be subject to audit. If the amendments are received late in the fourth year and insufficient time is available for the Department to commence a review of the amendments prior to the end of the year, the Department reserves the right to commence the audit at the beginning of the fifth year. If you have any questions, please contact Kris Pretty of the Compliance & Assurance group at 403-297-8785.

Industry Recalculation of 2006 Royalty

Industry initiated royalty recalculation requests for the 2006 production year must be submitted in writing to the attention of Wayne Taljit, Manager of Gas Royalty Client Services. This request must be received by the Department on, or before, December 31, 2010, and it must include the following:

- Identification of the recalculation facility or facilities;
- The reason for the recalculation;
- An order of magnitude estimate, i.e. the approximate amount of the royalty impact;
- Identification of the royalty clients that may be impacted by the request;
- The time lines for recalculation preparation and submission to the Crown including a reasonable time for the Crown to review the submission; and
- Confirmation that the affected partner(s) have been notified.

If you have any questions regarding this process, please contact your Gas Royalty Client Services portfolio representative as identified in [Section F](#) of this bulletin.

Gas and In-Stream Component (ISC) Reference Prices

In Information Letter 2010-24, the Department of Energy announced business process changes to the Gas and In-stream Component Reference Prices effective the January 2011 production month. These prices are used in the calculation of natural gas royalties. Attached are the [business rules](#), which describe in more detail the calculation of the Gas Reference Price using purchase prices at the Alberta Market Hub on the Natural Gas Exchange (NGX). Also included in the business rules is a description of the intra-Alberta transportation deduction, which reflects consultation with industry.

For further information, please contact Bill Zanewick at 403-297-5465.

Transitional Royalty Rate Election

Transitional royalty rates can only be elected until December 31, 2010, and must be elected whether the well is producing or not. Well events that have elected transitional royalty can chose to 'opt out' only between January 1, 2011 and February 15, 2011 on the Petroleum Registry of Alberta.

F. POINTS OF CONTACT

Petroleum Registry of Alberta

The Petroleum Registry of Alberta Service Desk is the focal point for communications with the Registry regarding preparations for, access to, or utilization of the Registry.

To contact the Petroleum Registry of Alberta Service Desk:

Phone: 403-297-6111 or 1-800-992-1144

Fax: 403-297-3665

Email: petroleumregistry.energy@gov.ab.ca

Alberta Energy Internet

Prices, Royalty Rates and Transportation Information are available on the Alberta Energy

Internet address: www.energy.alberta.ca, from “Our Business”, navigate to “Natural Gas”, “About Natural Gas”, “Prices”, “Alberta Natural Gas Reference Price (ARP)”.

In addition, both the Gas Royalty Information Bulletins and Information Letters are also available under “Our Business”, navigate to “Natural Gas”, “Legislation, Guidelines & Policies”.

Gas Royalty Client Services

Gas Royalty Client Services is structured as a Business Associate client portfolio system, which assigns a given Business Associate to one of four Client Services teams. Listed below is the portfolio breakdown along with Client Services Team Leads and phone numbers. The portfolios are divided by company name and not by BA ID.

Example: If your company name is the “Gas Company” you would call C – G team at 780-644-1202.

Business Associate	Phone Number and E-mail Address	Team Lead
Numbered companies, A, B & L	780-644-1201 GRCST1@gov.ab.ca	Todd Atwood
C – G	780-644-1202 GRCST2@gov.ab.ca	Lily Hiew
H – P (excluding L)	780-644-1203 GRCST3@gov.ab.ca	Chris Nixon
Q – Z	780-644-1204 GRCST4@gov.ab.ca	Jyoti Bhambhani

Gas Royalty Reception: 780-422-8727
Fax: 780-427-3334 or 780-422-8732
Alberta Toll Free: 780-310-0000

Hours of operation are 8:15 a.m. to 4:30 p.m. Voice messages left after 4:30 p.m. will be answered the next business day.

In situations where a company has just amalgamated or purchased another company, the general rule is to call the team that is responsible for the “Supra” business associate, or Royalty payer. Below are some guidelines for clients who are unsure which Client Services Team to call regarding their questions.

1. **Amalgamation/consolidation** - Call the team responsible for the “Supra” business associate (Royalty Payer).
 - i.e. ABC Oil and Gas amalgamates with Zed Exploration and Zed is the amalgamator (royalty payer). When calling Client Services regarding business for ABC Oil and Gas, you would call Team 4 (Q-Z) (780-644-1204) because Zed Exploration is now the Supra business associate and royalty payer. This rule would apply even if you were calling regarding business that is prior to the acquisition or amalgamation.

2. **Asset Purchase** - Call the team responsible for your company.
 - i.e. 123 Gas purchases the assets of TSP Exploration, but not the company. When calling Client Services regarding business for 123 Gas, you would call Team 1 (# Co., A, B, & L) (780-644-1201) because you have only purchased assets.

3. **Consultants/service providers** - If you have a contract to provide production accounting services to a company, call the team responsible for your client’s company.
 - i.e. Paul Snow Consulting Services enters into a contract with Duckback Oil and Gas and Olive Oil and Gas. Paul Snow would contact Team 2 (C-G) (780-644-1202) to discuss Duckback Oil business and Team 3 (H-P excluding L) (780-644-1203) to discuss Olive Oil and Gas business. At the time the contract is signed, Paul Snow would have had each company notify the appropriate team that he was authorized to access information for their company.

Effective the January 2009 production period, the royalty rates for **methane** and **ethane** will be calculated based on a new royalty formula. The new royalty formula consists of the sum of a price component and a quantity component. The new royalty rates will range from 5% to 50%. **Propane** and **butanes** will have fixed royalty rates of 30%, whereas **pentanes plus** will have a fixed royalty rate of 40%.

The price component of the new royalty formula royalty rate for methane and ethane is determined by the monthly methane or ethane par price (PP)

Price (\$/GJ)	r_p
$PP \leq 7.00$	$(PP - 4.50) * 0.0450$
$7.00 < PP \leq 11.00$	$(PP - 7.00) * 0.0300 + 0.1125$
$PP > 11.00$	$(PP - 11.00) * 0.0100 + 0.2325$
Maximum	30%
Minimum	Can be negative (-20.25% if PP=0)

The par price is a provincial weighted price determined by the department and published in the Information Letter for each production month. Determination of the par price has not changed under the Alberta Royalty Framework.

The quantity component of the new royalty formula royalty rate for methane and ethane is based on the average daily production (ADP) of the well event. The quantity component is adjusted for either the depth of the well event and/or the acid gas content of the well event.

Quantity ($10^3 m^3/d$)	r_q
$ADP \leq (6 * DF)$	$[ADP - (4 * DF)] * (0.0500/DF)$
$(6 * DF) < ADP \leq (11 * DF)$	$[ADP - (6 * DF)] * (0.0300/DF) + 0.1000$
$ADP > (11 * DF)$	$[ADP - (11 * DF)] * (0.0100/DF) + 0.2500$
Maximum	30%
Minimum	Can be negative

The ADP for a well event is the total raw gas production in thousand cubic metres ($10^3 m^3$) for the month divided by the total hours of production in that month multiplied by 24. The ADP formula is as follows:

$$ADP = \frac{\text{Total raw gas production}}{\text{Total hours of production}} \times 24$$

Acid Gas Factor (AGF) is a factor that adjusts the ADP of a well event if that well event is producing high amounts of acid gas, that is, if the combined concentration of hydrogen sulphide (H₂S) and carbon dioxide (CO₂) is greater than 3% and less than or equal to 25%. If a well event has an acid gas content of less than or equal to 3%, then the AGF of the well event will default to 1.00. If a well event has acid gas content greater than 25% then the AGF has a minimum value of 0.78.

The AGF is determined based on the following formula:

$$AGF = [1.03 - (H_2S\% + CO_2\%)]$$

The ADP is adjusted by multiplying the ADP by the AGF, that is:

$$\text{Adjusted ADP} = ADP * AGF$$

The acid gas content of a well event, used by the department for the determination of the AGF, will be according to the records of the ERCB.

A depth factor (DF) is required for all well events, and is calculated based on the measured depth (MD) according to the records of the ERCB for that well event. Information on the MD, of a well event, can be found on the Petroleum Registry of Alberta (PRA) in the 'Infrastructure' section.

The DF is used in the determination of the quantity component (r_q) of the royalty rate; it adjusts the quantity component royalty formula for measured depths that exceed 2000 metres. The DF for a well event is determined based on the following formula:

$$DF = \left(\frac{MD}{2000} \right)^2$$

A well event with a MD greater than 2,000 metres will receive a royalty adjustment based on production from the well event. A well event without a reported MD or with MD less than or equal to 2,000 metres will have a DF of 1.00. The DF is capped at 4.00 for well events with MD greater than or equal to 4,000 metres.

$$\text{If the MD is } \begin{cases} \leq 2,000 \text{ metres, then the DF} = 1.00 \\ > 2,000 \text{ metres and } < 4,000 \text{ metres, then DF} = \left(\frac{MD}{2000} \right)^2 \\ \geq 4,000 \text{ metres, then the DF} = 4.00 \end{cases}$$

Business Rules

Gas and In-stream Component (ISC) Reference Prices

Simplified Netback Model using NOVA Inventory Transfer (NIT) Purchase Prices - Effective January 2011 Production Month

1. Effective with January 2011 production month, the mechanism for calculating the Gas Reference Price (GRP) will change from a total dispositions netback model to a simplified Alberta netback model. The new calculation will use an average purchase price at NOVA Inventory Transfer (NIT) on the NOVA Gas Transmission Limited pipeline (NGTL), as a proxy for all Alberta gas sales. The Alberta Market Price (AMP), a new index on the Natural Gas Exchange Inc. (NGX), will be used as a proxy for the average purchase price at NIT.
2. Same Royalty Variables for Gas and ISCs - The Department of Energy will continue to publish a provincial Gas Reference Price and a provincial Reference Price for each ISC. The price used to value residue natural gas at the exit of the gas plant (royalty valuation point) will continue to be the Net Gas Reference Price. The Net Gas Reference Price at a facility is the ISC weighted average of each ISC (C1, C2, C3, C4, C5+) Reference Price minus a royalty calculation point specific gas transportation allowance TA (Refer to Appendix A – Detailed Business Rules for Transportation Allowance).
3. Methane ISC (C1-ISC) Reference Price is determined to be the same as the GRP.
4. The reference price for ethane ISC (C2-ISC) and recovered ethane is determined to be the same as the GRP until there is an open market for recovered ethane at Edmonton, with readily available ethane market prices.
5. The reference prices for propane ISC (C3-ISC), butanes ISC (C4-ISC) and pentanes plus ISC (C5+ISC) are determined to be the same as the GRP until otherwise changed. This temporary valuation process is expected to change January 2012 Production Month following consultation with industry.
6. Effects of amendments to prior months resulting from errors or omissions are carried forward into the current month's GRP or ISC RPs, up to a maximum of 2 per cent of the current month's GRP or ISC RPs. This mechanism will adjust a future month's GRP/ISC RPs for amendment effects related to the old Gas/ISC Reference Prices system, and for amendment effects (expected to be rare) related to the new Gas/ISC Reference Prices system. Amendment effects for ISC Reference Prices for pre-January 2011 could result in ISC Reference Prices that may be different from the GRP for the production months of January 2011 to April 2011. For May 2011 and

future production months, ISC reference prices are not expected to be different from the GRP due to prior period amendments.

NEW Gas Reference Price Calculation (GRP)

1. The GRP = ((AMP – IATD)* Pipeline Fuel/Loss Factor)+/- Prior Period Amendments
 - a. AMP is the Alberta Market Price calculated by NGX, which is an average of NGX purchase prices for gas delivered in a month at Nova Inventory Transfer (NIT) on the NOVA Gas Transmission Limited pipeline (NGTL).
 - b. IATD is the Intra-Alberta Transportation Deduction, which is an allowance calculated monthly for transporting gas from receipt locations on the NGTL system to NIT. The calculation based on current transportation tolls is as follows:
 - use the average firm service receipt rate on NGTL in $\$/10^3\text{m}^3$ in effect for the month (currently the average of three year firm service receipt rates on NGTL),
 - divide by the average number of days in a month (30.417), and
 - divide again by the average $\text{GJ}/10^3\text{m}^3$ of all NGTL receipt meter stations that received gas in that month (July 2010 is 39.3).
 - c. Pipeline Fuel/Loss Factor is a notional allowance for pipeline fuel/loss on NGTL for transporting gas from receipt locations on the NGTL system to NIT. Pipeline Fuel/Loss Factor is calculated by subtracting the monthly fuel/loss percentage on NGTL (from TCPL's website) from "1".
 - d. Prior Period Amendments are the effects of changes to previous GRPs

Appendix A

Detailed Business Rules for Transportation Allowance Meter Station Factors

1. The Transportation Allowance (TA) is a royalty calculation point specific gas transportation allowance (similar process as pre-January 2011). The TA is zero for a royalty calculation point that is not connected to the NGTL pipeline system. The amount of the TA for a royalty calculation point connected to a NGTL meter station will approximate the difference between the NGTL firm service rate for that meter station and the NGTL system average Transportation Allowance (IATD) used in the calculation of the GRP.
2. $TA = (RTF - 1) D$
 - TA is the Transportation Allowance for gas at a royalty calculation point.
 - RTF is the Royalty Trigger Factor at a royalty calculation point and is calculated as the disposition weighted average of receipt meter station factors for gas delivered to each NGTL receipt meter station from the royalty calculation point in a month.
 - If a royalty calculation point is connected to one or more NGTL meter stations and to a non-NGTL meter station, a simple average of the connected NGTL meter station factors shall apply to dispositions to the non-NGTL meter stations.
 - For gas dispositions at a royalty calculation point not connected to a NGTL receipt meter station, the RTF is “1”.
 - D is the Adjusted Intra-Alberta Transportation deduction at a royalty calculation point and is calculated as the ISC weighted average of prescribed adjusted intra-Alberta transportation deductions for each ISC.
3. The Adjusted Intra-Alberta Transportation deduction (AIATD) for each ISC will be calculated using the IATD in the calculation of the GRP, multiplied by the Pipeline Fuel/Loss Factor.
4. A meter station factor is calculated for a NGTL meter station by dividing the NGTL base rate for firm service receipts in $\$/10^3\text{m}^3$ (currently three (3) year rate), by the average firm service receipt rate on NGTL (currently average of three (3) year firm service receipt rates). Meter station factors will be calculated by March 15, effective for the January production month using the rates in effect for the January production month. Also calculated by March 15 are retroactive revisions to meter station factors due to new meter stations, new connections to old meter stations, or a change in a specific NGTL meter station rate. There will be no revisions to meter station factors as a result of NGTL general system rate changes, since meter station factors before and after the rate changes would not likely be materially different.
