MINERAL RIGHTS INFORMATION BULLETIN 2007-02

SUBJECT: NEW REPORT LISTING DEEPER RIGHTS REVERSION ZONE DESIGNATIONS (DRRZDs) AND ZONE DESIGNATIONS (ZDs) BY COMPANY

The Department of Energy has developed a new report listing Deeper Rights Reversion Zone Designations and Zone Designations by company. Your company can access the report through the department's Electronic Transfer System (ETS) or by requesting the report through the Energy Information Centre in Calgary.

The new report is called the Land Status Automated System (LSAS) Report 106 DRRZD/ZD Search by Client ID. Your company can use this report to identify all of your agreements which are connected to ZDs or DRRZDs. If you key in your Client ID Code, the report will identify all agreements where your company is the designated representative. In addition, you should indicate whether you wish to receive a basic agreement search for each agreement number reported. You can request this same report for a specific DRRZD or ZD to identify all of the agreements where your company is the designated representative having that specific DRRZD or ZD within the land description of any of your agreements.

Once you have entered the selection parameters such as client id, type of report and possibly a specific DRRZD/ZD, the department will process your request. The report will include a list of DRRZD/ZDs and all associated active agreements where your company is the Designated Representative. Basic agreement searches for each agreement by DRRZD/ZD will be reported as per your request. The cost of the report is \$30.00, regardless of whether you request summary or detailed agreement information for all DRRZD/ZDs or specific ones. The report is available in a PDF, text or ASCII file format.

If you do not have an ETS user id, please refer to the Alberta Energy website at www.energy.gov.ab.ca/ and click on the ETS link. ETS will provide you with instructions on how to apply for access and also identify the types of reports and services provided.

Information Letter 1998-14 dated April 29, 1998 is a good resource for anyone needing more information about DRRZDs and ZDs. Additional information about DRRZDs and ZDs is also available on the Resource Land Access and Tenure pages on the Alberta Energy website.
